

Dimensions

Black line is Bleed size (92x56mm)

Red line is complete size (90x54mm)

Front side CMYK

Check List (Please read carefully before you send the file)

- () are the dimensions correct. (We cannot print incorrect dimensions)
- () are there any objects /Text within 3.0mm of the cutting lines. (Any critical objects should be at least 3.0mm from the cutting lines as movement will occur during the cutting process)
- () is the file saved in CMYK format. RGB or Pantone must be converted prior to print (We do not print RGB and Pantone, so all object and pictures must be converted to CMYK)
- () is the rate of CMYK is less then 250% (The rate over 250% causes saturation which will create stains, and other unpleasant results)
- () are image embedded and not linked (linked image will not exist when we open the file.)
- () are embedded images at least 300dpi EPS or TIFF format, saved in CMYK mode (other image format may cause unpredictable results when printed)
- () is all the text outlined (Font may not be available if you don't outline your text)
